

# NWSTC Clinical Research for Surgeons meeting

17th March 2023

A fantastic day at the RCS hub.

Some very informative talks from Matt Parkes about Trials methodology and how to deliver clever trials.

A very educational talk on statistics from Ashley Best, and some very thought provoking information about sustainability in surgery from David Jones.

This fed into fantastic discussions and new ideas for research studies, with sustainability at the heart of them.

Great to see such enthusiasm for change the future of surgery from all the participants.
